At 1.40 p.m. on Sunday, the 6th Inst. clear bright day, the City of Rio de Yanetro going at full speed, struck an unknown sunken rock near Nomanosaki, off the coast of the province of Satsums, about 100 miles south of Nagasaki. She tore a bole in the starboard side forward about rs long by 4 feet wide. She was immediately headed for the shore, about two miles away, and as there was no beach in the vicinity her nose was put on some broad boulders where she lay in some discomfort, but more or less easily until a tug arrived from Nagazaki. Her forehold, which had immediately filled with water, was then numbed out, some mattresses placed over the opening, and she proceeded up the coast, As the natch showed signs of weakening, she steamed into a small landlocked cove, perfectly sheltered, where the patch was repaired, and the passengers and mails transferred to the tug and sent on to Nagasaki. A considerable amount of cargo was jettisoned, and it is now known that the steamer was expected to leave the cove and arrive in Nagasaki yesterday or to-day, but up to the present time her arrival has not been reported. It speaks well for the staunchness of the versel and the good management afterwards, that notwithstanding the speed at which she was going when she struck, the enormous rent, and the quantity of water which poured in, filling the fore compartment at once, that her bulkheads bold firm, and that she was able to

The extensive repairs to the China and Manila Co.'s Hongkong-Manila liner Zafiro, Captain Gerard, -necessitated by an unfortunate accident about six weeks ago, resulting in the steamer grazing North Point,-baving been completed by the experts of the Hongkong and Whampon Dock Company, this well known steamer went out for a trial of her engines last Saturday. A party of ladies and gentlemen, including Mr. and Mrs. D. Gilles, Mr. and Mrs. Lockley, Mr. and Mrs. Gordon, Messra, R. Shewan, C. Tomlin, Captain E. Burnie, Mesers, R. Cooke, A. Tohnston, Wilson, F. Plumacher and J. Kirkwood were on board shortly after 1 p.m., and a start for a trip round the island was commenced from the Dock Co.'s buoy, Hungham, at 1.20 p.m. After passing Green Island the guest's sat down to an excellent tiffin provided by Captain Gerard. which was done ample justice to. The tiffin over, the steamer was put on the Admiralty course over which she made two runs, attaining a speed of 122 knots per hour-a most satisfactory result. The vessel was then headed for the harbour, where she arrived at 5.30 p.m., after a very pleasant afternoon's outling,

The Zafiro will shortly resume duty on the longkong-Manila route.

THE PUNJOM MINING COMPANY LIMITED.

A STORMY MEETING.

The third ordinary general meeting of shareholders in the Puriom Mining Company. Limited, was held at the Head Office of the Company, Connaught House, Queen's Road Central, at noon to-day, Mr. Jas. Orange (Chairman of the Board of Directors) presided. and there were also present Mesers, D. Gillecer, Capitale ere ameir, E. Hurnie and G. C. Anderson, and Messrs. W. Shewan, R. Cooke, Andrew Johnston, F. E. C. George, J. Kirkwood, E. F. Alford, R. Milchell, H. M. Mehts, G. Holmes, R. C. Wilcox, J. Manuk, G. C. Cox, J. A. Machado, S. Perry, R. Fraser-Smith, S. I.

The Chairman said-Gentlemen, -with your before asking you to pass the report and accounts I will make a few remarks on the work done. A report was received from M Blamey by last mail giving a review of the work NOTICING a recent Ladies! Smoking Concert, done during the past year and I will now read given at the Queen's Hall, London, by it; the report will be printed and sent the ultra-aristocratic Amateur Musical Society, each shareholder. [Report read.] By letter "The Strolling Players," the Daily Telegraph Mr. Blamey has advised us that with regard says :- A " ladies' smoking concert " should not to the Mill Gully Reef, the drive going south go unrecorded as a social event, or, as some broke into old workings and that the drive would call it, a step towards emancipation of the going north has met with a big dyke formasex. We have quoted the description of an tion which has thrown the reef out of its proper entertainment given by the Strolling Players in course, but he is certain that this disturbance is Queen's Hall on Thursday, evening; but let only temporary, as evidenced by the old workings none suppose that the ladies smoked going further north moving the continuation of They, were simply invited to take tobaccer the reel. Mr. Blamey regrets that these changes, second hand, and this they did under while not lessening the value of the discovery in chiquestances of unumal, distinction, the his estimation, will greatly interfere with the gallant Players having had the handsome ball output of gold expected for December, and I swept and garnished, adorned with flowers and must admit that I had hoped for a good outpalms, and what not else that goes to make up a put for December, and we were all somewhat pretty scene. So far all was well, and the guests exercised to account for the result until we greatly enjoyed their visit. But of first importance. Megone's orchestra was in we have not got this amount as cash in hand, for we have been obliged to spend the greater part of the money earned in payments which properly beleng to Capital account. These payments are approximately as follows :---

or say \$1.7% per ton. I recognize, however, that we ought to work somewhat cheaper than the Cape (hear, hear) and I think we can rely on Mr. Blamey to reduce expenditure in every way be can, as I am certain no one is more anxious than he is that such a profit is made that there will be a balance left for the shareholders and not only for the mine. We were very pleased to see that the long-projected road from Kwala Kubu to Kwala Lipis is at last being vigorously pushed on. The construction of this road, which we hope will pass within a miles of Talis, will be of immense assistance to us. The Cyanide plant was ordered and is at the mine. The erection has been greatly delayed by unusually heavy rains, which have prevailed all over Pahang, and we do not think the plant will be at work until March. The chemist, Mr. White, reports that the tailings and concentrates are very suitable for the treatment, as also the water. The plant is supposed to treat 1000 tons per month, and as we have a large stock of by loud applause. tailings' besides the results of our crushings, we hope that the success of the present plant will full capacity of our milling power. The Chairman (after slight hesitation)-I beg to move the adoption of the report and accounts. Mr. Wilcox seconded.

Before a vote was taken on the motion, Mr. drkwood called attention to the fact that according to the Report before the meeting, the Company's gold was fetching only £3.10 per ounce, whereas the average value of the preclous metal was £3.17.6. He wished to know if there was anything wrong with the grade of ore and how it was disposed of at what appeared a considerable loss to the shareholders?

The Chairman, in reply, said pure gold was low worth £3. 17s. od, per ounce, but the Company's gold had bitherto been disposed at an average price of £1 12s, per ounce because it was not clean, refined, gold, ... Mr. Kirkwood-Well, would it not be cheaper. to have it reflued before selling it?

The Chairman-You are quite right; but to do so we must have a skilled assayer. That will be done as soon as possible, and when we have a skilled assayer at the mines we shall sell only refined gold. Mr. R. Cooke called attention to the entry in

the accounts-" Part value of gold. August and September crushing." What did "part" mean was it 7/soths, 3/4thsor 1/5ths, or what portion He had looked in vain through the report and accounts and listened attentively to the Chairman's speech without getting any light on the

The Chairman replied that had the on extracted in 1804 been of the same quality of that sent home the year before, the Directors. would have come before the shareholders on the present occasion with a very good report, but unfortunately it had turned out otherwise. Thecyanide process, it was hoped, would prove the Company's salvation. Unless the \$20,000 laid out on procuring the cyant'e machinery were expended there could be no hope of getting the sbareholders' money back.

A discussion then arose between Mr. Cooke and the Chairman as to whether the shareholders had rever sanctioned the purchase o cyanide mechinery. Ultimately the Chairman quoted the minutes of the meeting held to consider the advisability of going in for the cyanide process, and this resulted in Mr. Cooke ... taying "Well, according to my motion, which you have read, you should have notified the shareholders when the Directors decided to adopt the process," a remark which was followed

> The Chairman-I have explained Mr. Fraser-Smith said that no explanation 1 \$39,000 odd was preposterous and wrongly entered in the accounts. It was an old custom in Hongkong that Directors should not receive fees where no dividends were paid. Some directors, to their credit be it said, had positively declined to eccept fees from companies that paid no dividends, and he thought two or three at least of the Directors of the Punjom Mining Company, personal friends of his own, would be very sorry to take a fee under existing circumstances. No doubt the manager's and directors' services were very valuable, but he failed to appreciate their value. He must emphatically protest against the sum of \$2,500 for directors fees being included in the accounts. Mr. Cooke had called attention to several important matters and so, very properly, had Captain Tillett. If the Co's property was deteriorating sufficiently to justify \$46,000 being written off in one year, then that showed the whole business was being muddled up and the sconer there was a change the better would it be for the shareholders, whom he hoped would support his amendment to the Chairman's motion, of a vote of he confidence in the Chair-

man and Board of Directors. (Applagee) Mr. R. Cooke said he was very sorry to ave to do so but he felt bound to second the proposite tion, as everything Mr. Praser-Smith had said was absolutely true.

The Chairman-I am certainly not going to enter into any defence. I hope the Board have enough friends present to insure the adoption of the report and accounts. THE PLAGUE IN TUNG KUN.

The following official report of the bubonic plague in Tunkun district, in the province of Kwangtung, about fifty miles from Hongkong, was published in the Government Gazette on Saturday. It endorses the reports on the same subject which from time to time during the past four or five weeks appeared in the Hongkong Telegraph. The state of affairs as sat forth by Dr. Westcott, though by no means serious at the present time, indicates elements which, it appears, many possibly develop into a somewhat serious epidemic at no distant date, and it therefore behaves the Government to keep a sharp watch on passengers arriving from that part of the mainland. The report reads as follows :-

Hongkong, 7th January, 1895. SIR,-I have the honour to report that I proceeded to Tung Kun on the 27th ultimo to investigate the disease stated to be prevalent

was accompanied from Canton by Mr. F. S. A. Bourne, the Vice-Consul at that port. At Tung Kun on the 31st December, I interviewed Dr. Kühne, of the Rhenish Mission, who has been resident at the Mission Hospital for the last seven years, and he informed me-

I. That the Chinese Doctor at Shek Lung. a large town on the East River, 8 miles N.W. of Tung Kun, was at Tung Kun on the 29th the axillary glands being affected.

2. That he had heard from his Chinese teacher that in Tung Kun on the 3rd December a boy to years old came to the Hospital grounds from the country to see some friends, and in the evening he became ill and died on the following night from high temperature and syncope. His grandmother, living in the same house, became ill 6 days afterwards, and on the second day of the disease, she sent to borrow Dr. Kühne's clinical thermometer, which, on return, registered family circulated a report that the Doctor's thermometer had caused her sxillary glinds | beheaded,

The conclusions I draw from this enquiry

I. That there have been sporadic cases of the disease during November and part of December in Canton, Fatshan, Shek Lung and Tung Kun. 2. That no cases have been found during the

last fortnight by anybody. 3. That all those who reported the cases is

December can find none now. 4. That it is evident that the poison lingers

in the district, but whether it will again cause an epidemic will depend on the sanitary surroundings and climatic conditions which it will encounter.

The whole of the drains in Canton are cleaned every third year, and they have just been cleaned | latter was waylaid and murdered, in accordance with this custom. The Chinese also attach much importance to the rain which has recently fallen, but it was evident after an inspection of the houses in the parts of Canton from which the greatest number of cases came the other conditions be favourable.

investigation have proved to be due to diseases other than plague, the confusion arising from the fact that the Chinese have no specific nomed clature for bubonic plague, but employed the terms "Wen-ylk" and "Shih-cheng" which embrace any suddenly fatal epillemic disease. In closing this report. I have the bonour to

bring to your notice the kind manner in which the mission was received by Dr. Kühne and the great trouble he took to help us in every way. I also met with all possible help from Mr. Bourne, the Vice-Consul at Canton; his knowledge of the country, people, and language enabled me to overcome many difficulties and to

accomplish my mission in a very much shorter time than would otherwise have been necessary. Interpreter W. Quincey was also a valuable assistant and displayed great intelligence and tact in the performance of his duties.
